

DANISH QUALITY
RAINWEAR
SINCE 1958.

**DANISH QUALITY
SINCE 1958.**

THE OCEAN[®] STORY

DANISH QUALITY SINCE 1958.

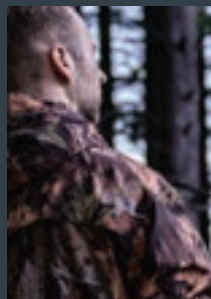

It started with rainwear back in 1958
– and respect for professionals who would wear it in rough
seas and other demanding work environments.

We manufactured these products based on the know-
ledge we gathered from talking to fishermen and resellers.
It taught us to focus on the features and the quality that
actually make a difference to these people.
And we stay true to this.

Today

Today, OCEAN® has more than 60 years of experience
in producing all-weather-wear.
We provide people in construction, industry, agriculture,
food, cleaning, and of course fishing and related industries
with functional high-quality clothing that keeps them
warm and dry and add to their safety.

Because of our long experience, the people we call
enthusiasts – those who enjoy challenging activities in
nature – have also discovered our clothing. We share their
passion and love to support their adventures too.

PROFESSIONAL RAINWEAR

PROFESSIONAL RAINWEAR

OCEAN® Professional Rainwear includes various types of rainwear: from heavy protection PVC garment to lightweight PU garment. The main part is produced in Europe.

The collection meets the European standards for protective clothing. The full collection range is certified EN 343 which reports protection against water and breathability. In addition, some products are oil resistant and flame retardant. A collection of highly protective rainwear for multiple industries.

WIDE RANGE

The most models within the Professional Rainwear collection come in a wide range of sizes and qualities suitable for various work tasks.

MADE IN EUROPE

The majority of our products are produced in Europe. We have production in Latvia and Portugal, and part of the production is made in-house in Herning, Denmark by a skilled and dedicated team with many years of experience in assembling professional rainwear.

+ ADD-ON SOLUTIONS

It is possible to add on cuffs or gloves for main part of our Heavy Protection collection.

Cuffs and gloves are welded onto the rainwear.

- The cuffs are available in rubber and neoprene, preventing water from entering the sleeve.
- The strong PVC gloves ensure that no water penetrates while protecting the user's hands.

ADJUST THE CUFF BEFORE USE

1:
Measure your wrist before
using a product with rubber
cuffs.

2:
Cut the rubber cuffs to fit
your measures.

ALLROUND RAINWEAR

Charlie Rainwear Set

A great rainwear set in light and soft material with functional pockets. Trousers with access-through-pockets to tools. The set comes in a handy box.

Item no.: 160009

EN 343 3-1

Water resistance: 5.000 mm

Ventilation back yoke

Cuffs with elastic and velcro

Concealed hood in the collar

Main fabric: 170 g/m², Polyester 60%, Polyurethane 40%

Suitable for: Construction sites, craft, farming, gardening

RAINWEAR FOR CRAFTSMEN

Charlie Rainwear is extremely soft and comfortable to wear.

This set is a must have to pull over your regular workwear at rainy days. The trousers are designed with access-through-pockets, so tools are reachable from the workwear underneath.

MAINTENANCE

If the rainwear is dirty after use

Clean it with running water.

Do not use brushes or cloths to rinse the rainwear, as it can damage the waterproof outer layer.

Hang the garment until it's dry.
In humid environments, incorrect storage can lead to fungal growth on the garments.

We recommend that the garment is washed by hand and only washed in machine when it becomes too dirty to be cleaned by hand as every wash depletes a small part of the waterproof layer. Use washing detergent without whitener and never use fabric softener. Hang the garment with the inside out until it's dry.

OCEAN

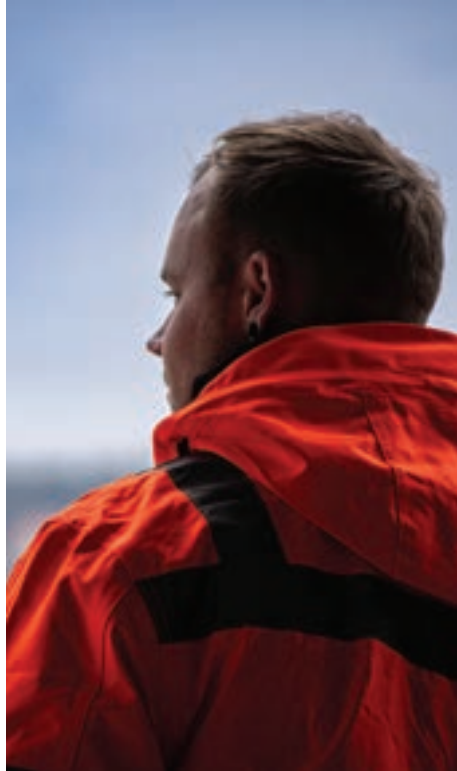

HIGH-VIS RAINWEAR

HIGH-VIS RAINWEAR

High visibility workwear is important and required - for example, when working near traffic or on construction sites. Our reflective clothing is certified according to the European standards.

OCEAN® High-Vis Rainwear is made to keep the user visible, dry, and protected while working in demanding environments. The fabric is made in a strong fluorescent color - orange or yellow. The color ensures the best possibilities of being visible in daylight, and the reflective tape provides improved visibility in dark and haziness.

QUALITY TRIM

The main part of the High-Vis collection is made with durable quality trim as YKK® zippers, 3M® Scotchlite® reflective tape and Prym® buttons.

WADERS

WADERS

OCEAN® Waders is a collection made in extremely durable PVC or neoprene. Designed to protect and being functional and comfortable in use.

The products meet the European standards for protective clothing - certified EN 343. The high waterproofness and protection make the waders ideal for various industries where you are working in wet environments.

Waders are one of our signature products and they are designed and assembled in-house in Herning, Denmark.

MADE IN
EUROPE

MADE IN EUROPE

All OCEAN® PVC waders are produced in Europe. A large part off the production is made in-house in Herning, Denmark by a skilled and dedicated team with many years of experience in assembling professional rainwear.

WASTE MATERIAL GETTING NEW LIFE

When the Waders are assembled, the boots are adjusted to fit the garment by cutting of the top of the boot shaft. The leftovers are processed into granules and then used in the production of new OCEAN® leisure boots.

DANISH QUALITY SINCE 1958.

CUSTOMIZE

OCEAN® PVC-Waders comes in three qualities
- *Classic, Original & Deluxe* and with various
boot options. Assembled in-house in Denmark.

OCEAN® BOOTS

Boot Hanger

Extend the life of your waders. Prevent the garment from getting damaged by using the OCEAN® boot hanger. Hang the waders immediately after use.

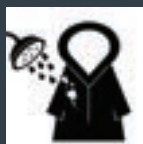

Item no.:170003

Material: Metal 100%

Suitable for: extend the life of your waders

MAINTENANCE

If the rainwear is dirty after use

Clean it with running water.

Do not use brushes or cloths to rinse the rainwear, as it can damage the waterproof outer layer.

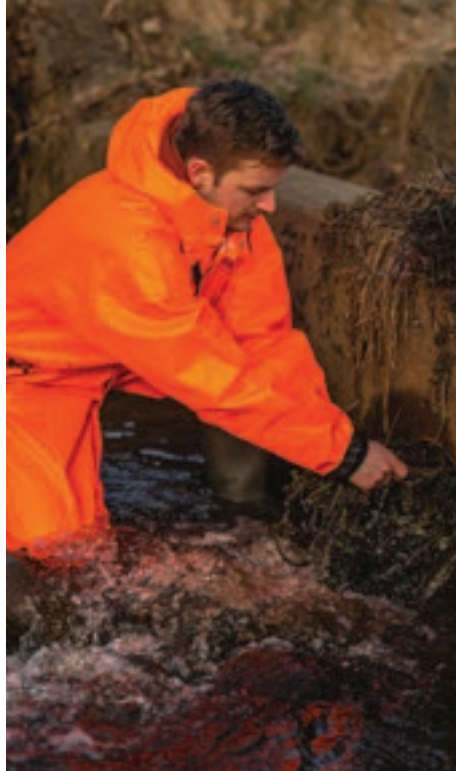

Hang the garment until it's dry.
In humid environments, incorrect storage can lead to fungal growth on the garments.

ONE PROTECTION SUIT

OCEAN®

ONE PROTECTION SUIT

OCEAN® One Protection suits keep the user completely covered and protected during frequent or prolonged work in water.

The products meet the European standards for protective clothing - certified EN 343 with a water column pressure at 20.000 mm. Ocean® One Protection Suits have welded boots and cuff or glove solution to ensure complete waterproofness and protection.

This collection protects the user in a wide range of work tasks in various industries like cleaning slurry tanks, sewage systems, or while working in demanding water courses.

MADE IN EUROPE

The majority of our products are produced in Europe. We have production in Latvia and Portugal, and part of the production is made in-house in Herning, Denmark by a skilled and dedicated team with many years of experience in assembling professional rainwear.

CERTIFICATES

EN 14116 **PROTECTION AGAINST FLAMES**

This standard specifies performance requirements for protective clothing with limited flame spread to reduce the possibility of clothing burning and thus posing a hazard.

EN 343 **PROTECTION AGAINST WATER**

EN 343 is the European standard for protective clothing against water. This certification describes the product's performance in relation to waterproofness and breathability.

W. STUDS

OCEAN

Boot Hanger

Extend the life of your suit. Prevent the garment from getting damaged by using the OCEAN® Boot Hanger. Hang the protection suit immediately after use.

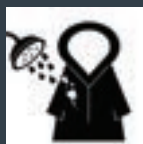

Item no.:170003

Material: Metal 100%

Suitable for: extend the life of your suit

MAINTENANCE

If the rainwear is dirty after use

Clean it with running water.

Do not use brushes or cloths to rinse the rainwear, as it can damage the waterproof outer layer.

Hang the garment until it's dry.
In humid environments, incorrect storage can lead to fungal growth on the garments.

CUSTOMIZE

It is possible to add on cuffs or gloves at the full range of One Protection Suit products.

Cuffs and gloves are welded onto the suit.

- The cuffs are available in rubber and neoprene, preventing water from entering the sleeve.
- The strong PVC gloves ensure that no water penetrates while protecting the user's hands.

ADJUST THE CUFF BEFORE USE

1:
Measure your wrist before
using a product with rubber
cuffs.

2:
Cut the rubber cuffs to fit
your measurement.

CLEANING

CLEANING

OCEAN® Cleaning collection is made of the strong and durable PU/ polyester or PVC/ polyester fabric and the main part of the collection is produced in Europe.

The products meet the European standards for protective clothing. The collection range is certified EN 343, and most of the products are also certified EN 13034 and EN 14605, which is chemical resistance and EN 1186, which means the products are approved to be in contact with food.

This collection protects the user in a wide range of work tasks in various industries.

WIDE RANGE

The most models within the Cleaning collection come in a wide range of sizes and in the colors; white, royal blue and olive.

MADE IN EUROPE

The majority of our products are produced in Europe. We have production in Latvia and Portugal, and part of the production is made in-house in Herning, Denmark by a skilled and dedicated team with many years of experience in assembling professional rainwear.

CERTIFICATES

EN 1186
GLASS & FORK

EN 1186 is a certification standard that measures the suitability of materials and products for food contact.

EN 14605 / 13034
LIQUID CHEMICALS

EN 14605: Protection against hazardous liquid chemicals.

EN 13034: Protection against light aerosol liquid chemical sprays.

EN 343
PROTECTION AGAINST WATER

EN 343 is the standard for protective clothing against water. This certification describes the product's performance in relation to waterproofness and breathability.

ALBERTVILLE PREMIUM

The Albertville Premium collection is made in durable PVC, resisting both water and chemicals and has good abrasion resistance, suitable for various cleaning industries.

The collection is made in Europe and with quality trim as YKK® zippers and Prym® buttons.

EN 1186

EN 14605

EN 13034

EN 343 3/1

DANISH QUALITY SINCE 1958.

Albertville Premium Smock

The smock is designed with a hood, YKK® zipper and with elastic cuff closure to prevent water from entering the sleeve opening. The smock is easy and comfortable to wear.

Item no.: 040025

EN 14605, EN 13034

Water resistance: 13.000 mm

Button closure front placket

EN343 3-1, EN 1186

Elastic cuffs

Main fabric: 300g/m² PVC 82%, Polyester 18%

Suitable for: Industrial cleaning, food handling, agriculture, tile cleaning

Albertville Premium Bib & Brace

The Albertville Premium Bib & Brace is made in durable PVC with flexible braces and elastic leg closure, which can easily be pulled over the boots.

Item no.: 030066

Elastic closure

Easy to apply

Waterproof

Main fabric: 300 g/m², PVC 70%, 30% Polyurethane

Fabric 2: 100% polyester

Suitable for: Industrial cleaning, food handling, agriculture, tile cleaning

MAINTENANCE

If the rainwear is dirty after use

Clean it with running water.

Do not use brushes or cloths to rinse the rainwear, as they can damage the waterproof outer layer.

Hang the garment until it's dry.
In humid environments, incorrect storage can lead to fungal growth on the garments.

We recommend that the garment is washed by hand and only washed in machine when it becomes too dirty to be cleaned by hand, as every wash depletes a small part of the waterproof layer. Use washing detergent without whitener and never use fabric softener. Hang the garment with the inside out until it's dry.

TECHNICAL RAINWEAR

TECHNICAL RAINWEAR

TECHNICAL RAINWEAR

OCEAN® Technical rainwear is a range of products in woven fabric, with great breathability and water resistance.

The products in this collection provide durable, waterproof and windproof protection, while having a great level of breathability to ensure that the body is kept dry and protected during physical work in a wet environment.

The collection includes both lightweight garments and insulated garments for colder days.

MEMBRANE

A product with membrane is the right choice for users with a physical demanding work. When the body releases moisture, the membrane allows the moist to pass through the garment.

Perform physically and remain dry and protected

Our quality membrane is developed with the purpose of letting vapor and moisture leave from inside, while water from the outside can't penetrate.

Rocky Stretch Jacket

Comfortable and functional jacket designed with inner wrist cuffs with wind stop, YKK® zipper and storm placket w. velcro closure. ID pocket and functional pockets.

0801

Item no.: 020038

Breathability: 5.000 g/ m²*24h

EN 343 3-3

Move freely with 4-way stretch

Water resistance: 10.000 mm

Neoprene storm cuffs

Main fabric: 220 g/m², Polyester 100%

Middle layer: Polyurethane 100% **Lining:** Polyester 100%

Suitable for: Construction, craft, agriculture, various outdoor work

Rocky Stretch Jacket Women

Comfortable and functional jacket designed with inner wrist cuffs with wind stop, YKK® zipper and front placket with storm flap and velcro. ID pocket and functional pockets.

0801

Item no.: 020037

Breathability: 5.000 g/ m²*24h

EN 343 3-3

Move freely with 4-way stretch

Water resistance: 10.000 mm

Neoprene storm cuffs

Main fabric: 220 g/m², Polyester 100%

Middle layer: Polyurethane 100% **Lining:** Polyester 100%

Suitable for: Construction, craft, agriculture, various outdoor work

BREATHABILITY

The ability of fabric to absorb and release moisture away from the skin.

Ocean® Technical Rainwear keeps the user dry due to great water resistance and because these products scores high when measuring breathability.

Rocky Stretch Trousers Unisex

Developed with focus on comfort and functionality, with details such as 4-way stretch, side pockets for tools, Cordura® knee reinforcement and detachable braces.

0801

Item no.: 010026

Breathability: 5.000 g/ m²*24h

EN 343 3-3

Move freely with 4-way stretch

Water resistance: 10.000 mm

Side pockets for tools

Main fabric: 220 g/m², Polyester 100%

Middle layer: Polyurethane 100% **Lining:** Polyester 100%

Suitable for: Construction, craft, agriculture, various outdoor work

WORKWEAR

Åbo Stretch Jacket

High-vis and waterproof certification. Functional jacket with double storm placket, with velcro and press-studs, YKK® zippers and taped seams. ID pocket and functional pockets.

Item no.: 020014

Breathability: 5.000 g/ m²*24h

with snap buttons

Reflexes

Front placket with
waterproof YKK® zipper
& velcro closure

Side pockets with
waterproof YKK® zippers

70% Recycled polyester

Cuffs with
neoprene windstop &
velcro closure

RECYCLED POLYESTER

Recycled polyester is a better choice in several ways. In terms of quality and durability, it is as good as conventional polyester, but the production of recycled polyester requires 59 percent less energy compared to conventional polyester. Likewise, recycled polyester can contribute to reduce the extraction of crude oil and natural gas from the Earth to make new conventional polyester.

RAINWEAR FOR THE MAJORITY

High Performance rainwear can be used in many professions where waterproof and windproof clothing is required in order to perform to perfection. Likewise for activity and adventures in nature in the spare time.

SUPPORT ITEMS

SUPPORT ITEMS

Support Items is a wide range of items that can be used in addition to OCEAN® rainwear to add value to the user.

Support Items is all the details that makes the difference. For examples quality boots, knee pads or comfortable midlayers which support and add to the rainwear.

In this range there is also repair kits for waders and heavy rainwear, boot hangers and safety vests to pull over outerwear and rainwear.

SUPPORT ITEMS

Support Items is all the details that makes the difference. Boots, knee pads and quality midlayers which support and add to the rainwear.

OUTERWEAR

Choose between Dunlop® Regular or Dunlop® S5 boots.
+ Studs can be added for both types of Dunlop® boots.

OCEAN® LEISURE REG

OCEAN® S5

DUNLOP® REGULAR

DUNLOP® S5

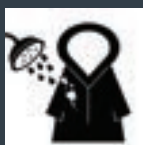

W. STUDS

MAINTENANCE

If the rainwear is dirty after use

Clean it with running water.

Do not use brushes or cloths to rinse the rainwear, as it can damage the waterproof outer layer.

Hang the garment until it's dry.
In humid environments, incorrect storage can lead to fungal growth on the garments.

We recommend that the garment is washed by hand and only washed in machine when it becomes too dirty to be cleaned by hand as every wash depletes a small part of the waterproof layer. Use washing detergent without whitener and never use fabric softener. Hang the garment with the inside out until it's dry.

OCEAN

CERTIFICATES

OCEAN®

CERTIFICATES

OCEAN® rain- and workwear is certified protective clothing in accordance with the European standards.

EN 343

Protection against water

EN 343 certified rain- and workwear provides protection against water penetration. Clothing with EN 343 certification is designed to provide waterproof and breathable protection to the user, keeping them dry and comfortable in wet-weather conditions.

This standard is important for those who are active while working in environments with exposure to rain, snow or vapor.

EN 20471

High Visibility

EN 20471 certified rain- and workwear provides high visibility to the user. Clothing with EN 20471 certification has fluorescent colors and reflective strips that are designed to make the user more visible in daylight, low-light conditions or during the night.

This standard is important for workers who work on or near roads, railways or any other environments where there is a risk of collision.

EN 1186

Glass & Fork

EN 1186 is a certification standard that measures the suitability of materials and products for food contact. Clothing with EN 1186 certification has been tested to ensure that it does not release harmful substances or chemicals that could contaminate food during handling, processing, or storage.

This standard is important for workers in industries such as food processing, catering, and hospital services, where workers may come into contact with food or food packaging materials.

EN 11612

Protection against heat & flames

EN 11612 certified rain- and workwear provides protection against heat- and flame-exposure by preventing ignition and reducing the risk of injury.

This standard is important for industries where workers may encounter fire or heat hazards, such as welding, firefighting, or industrial manufacturing.

EN 14116

Limited flame spread

EN 14116 certified rain- and workwear provides limited protection against heat- and flame-exposure by resisting the spread of fire and it self-extinguishes when the ignition source is removed.

This standard is important for industries where workers may be exposed to flash fires, such as oil- and gas-industries or electrical utilities.

IEC 61482-2

Electric Arc

IEC 61482-2 certified rain- and workwear provides protection against the thermal hazards of an electric arc. Clothing with IEC 61482-2 certification has been tested to determine its ability to protect the user against the thermal effects of an electric arc, including the heat generated, the pressure wave, and the electric shock.

This standard is important for workers in industries such as electrical utilities, construction, and maintenance, where there is a risk of exposure to electric arcs.

EN 14605

Liquid Chemicals

EN 14605 certified rain- and workwear provides protection against liquid chemicals. Clothing with EN 14605 certification has been tested for resistance to penetration by liquid chemicals, including acids, alkalis, and solvents, and must provide a barrier that prevents these substances from coming into contact with the user's skin.

This standard is important for workers in industries such as chemical processing, pharmaceuticals, and waste management, where workers may be exposed to hazardous liquids.

EN 13034

Liquid Chemicals

EN 13034 certified rain- and workwear provides protection against liquid chemicals. Clothing with EN 13034 certification has been tested for resistance to penetration by low-level liquid chemicals, including light spray and splashes of chemicals.

This standard is important for workers in industries such as petrochemicals, oil and gas, and chemical processing, where workers may be exposed to low-level chemical hazards.

EN 1149-5

Electrical Discharge

EN 1149-5 certified rain- and workwear provides protection against the risk of electrostatic discharge (ESD). Clothing with EN 1149-5 certification is designed to prevent or limit the build-up of static electricity on the user, reducing the risk of spark discharge that could ignite flammable substances or cause explosions in hazardous work environments.

This standard is important for workers in industries such as petrochemical, gas and mining where there is a high risk of explosions due to static electricity.

EN 11611

Welding

EN 11611 certified rain- and workwear provides protection against welding-related hazards. Clothing with EN 11611 certification has been tested for resistance to small molten metal splashes, radiant heat, and other welding-related hazards.

This standard is important for workers in industries such as welding, metal fabrication, and construction, where workers may be exposed to these types of hazards.
